

CREATING FURNITURE EXCELLENCE

QFLOW™

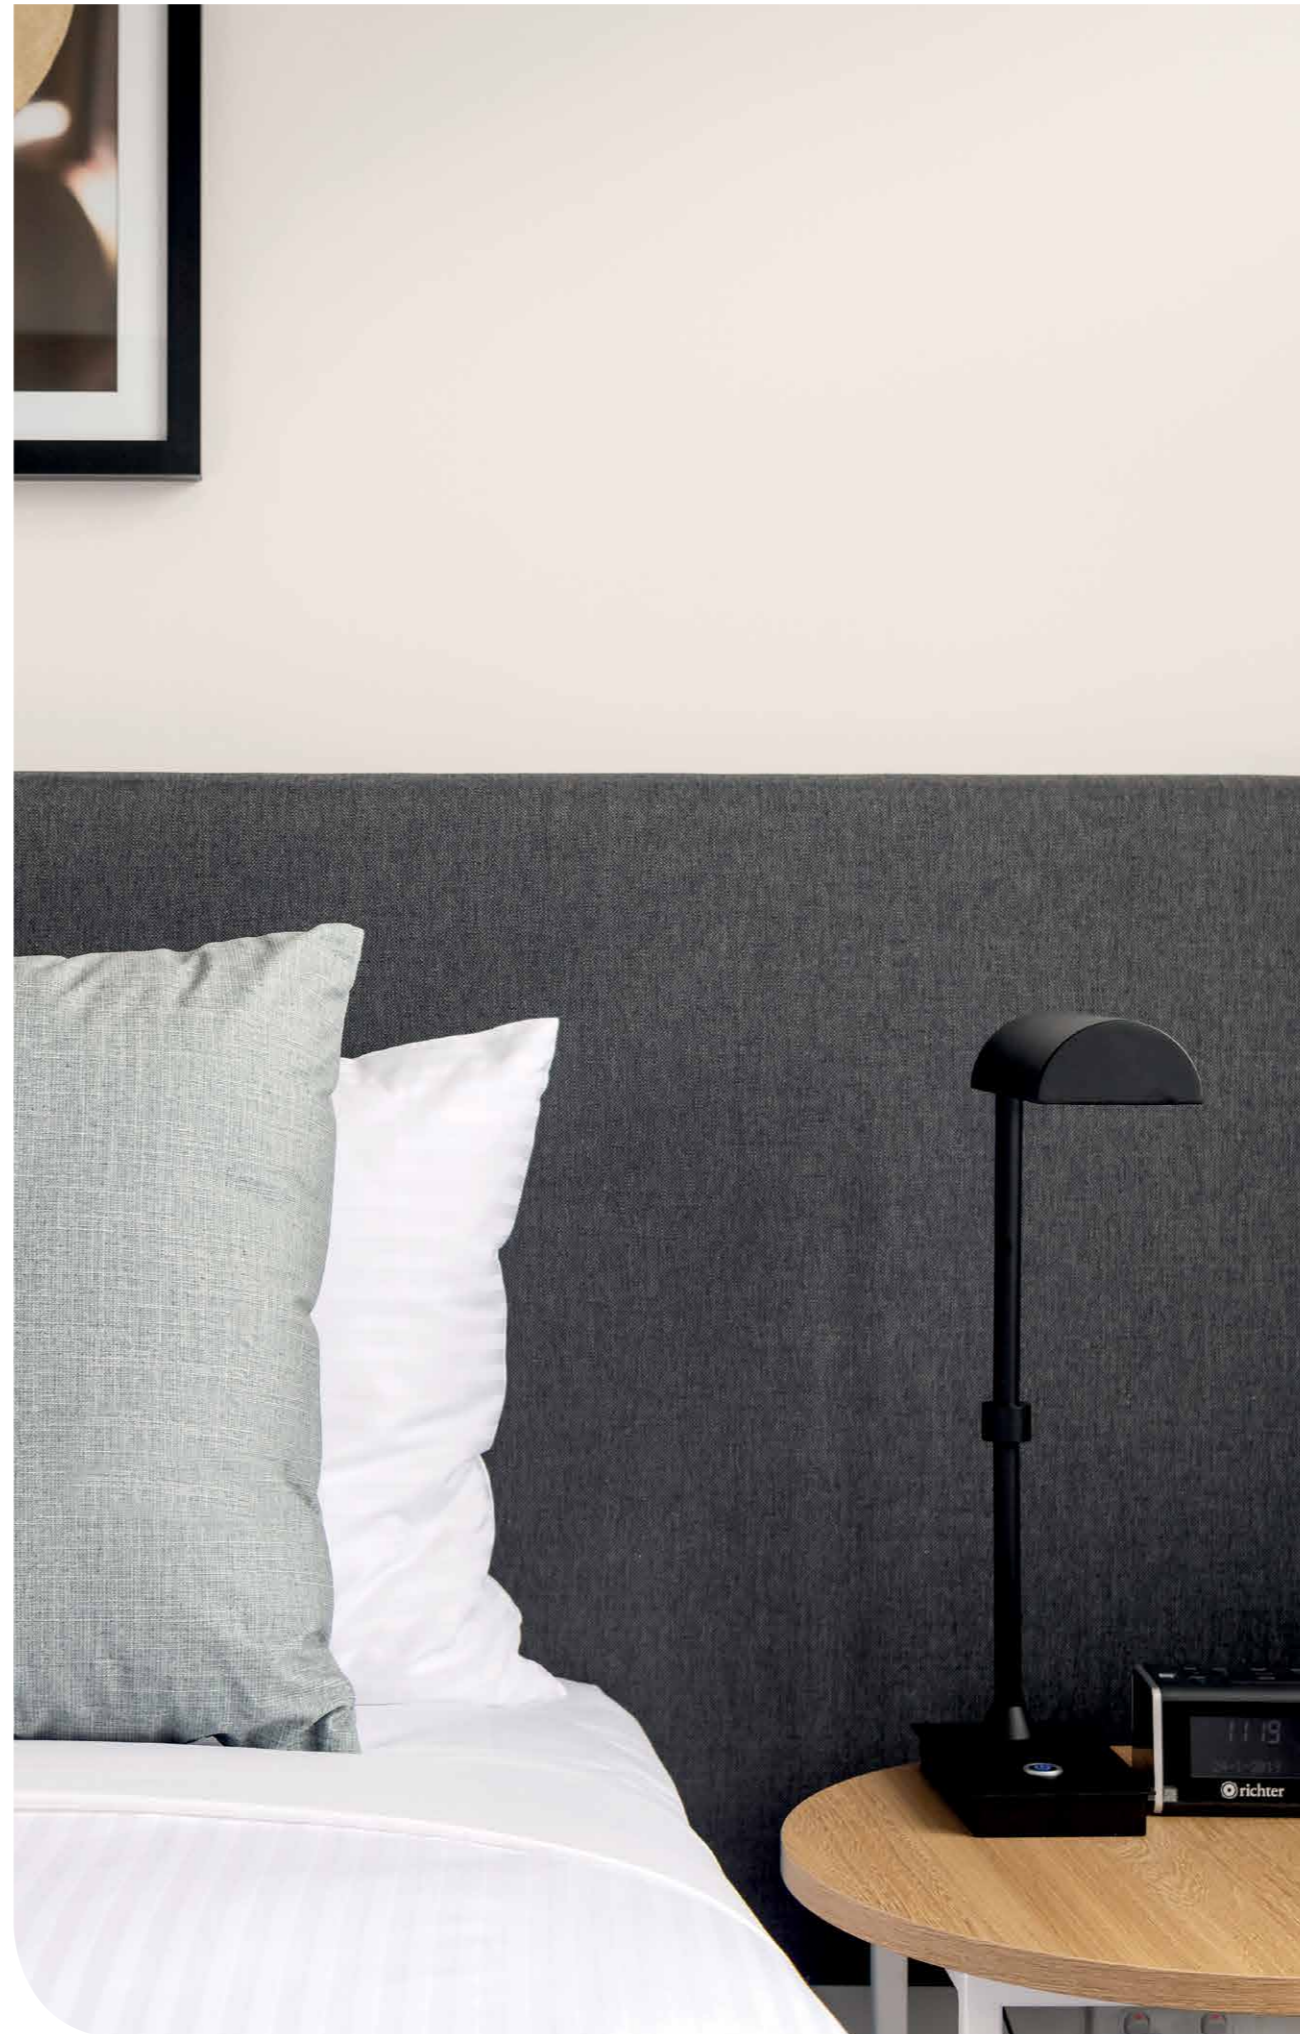

QFLOW

PEACE OF MIND FROM A TRUSTED AUSTRALIAN-OWNED FF&E SOLUTIONS PROVIDER

As a long time established FF&E Service Provider, QFlow offers a single point of contact when assisting its clients with the stages of Design, Creating Shop Drawings, Product Sampling, Manufacturing, Quality Control and Installation.

Our factory-direct approach and years of experience in FF&E project fulfilment and our unique client commitment brings a willingness to become your single point of contact – while remaining flexible to the changing needs of the marketplace ensures we are agile enough to deal with the needs of our clients both small and large.

We provide our clients with an easy solution to Quality Products, Competitive Pricing and Exceptional Service. With offices in Sydney Australia and manufacturing plants in Guangzhou China, QFlow will always have a team member on the ground to provide its clients with peace of mind.

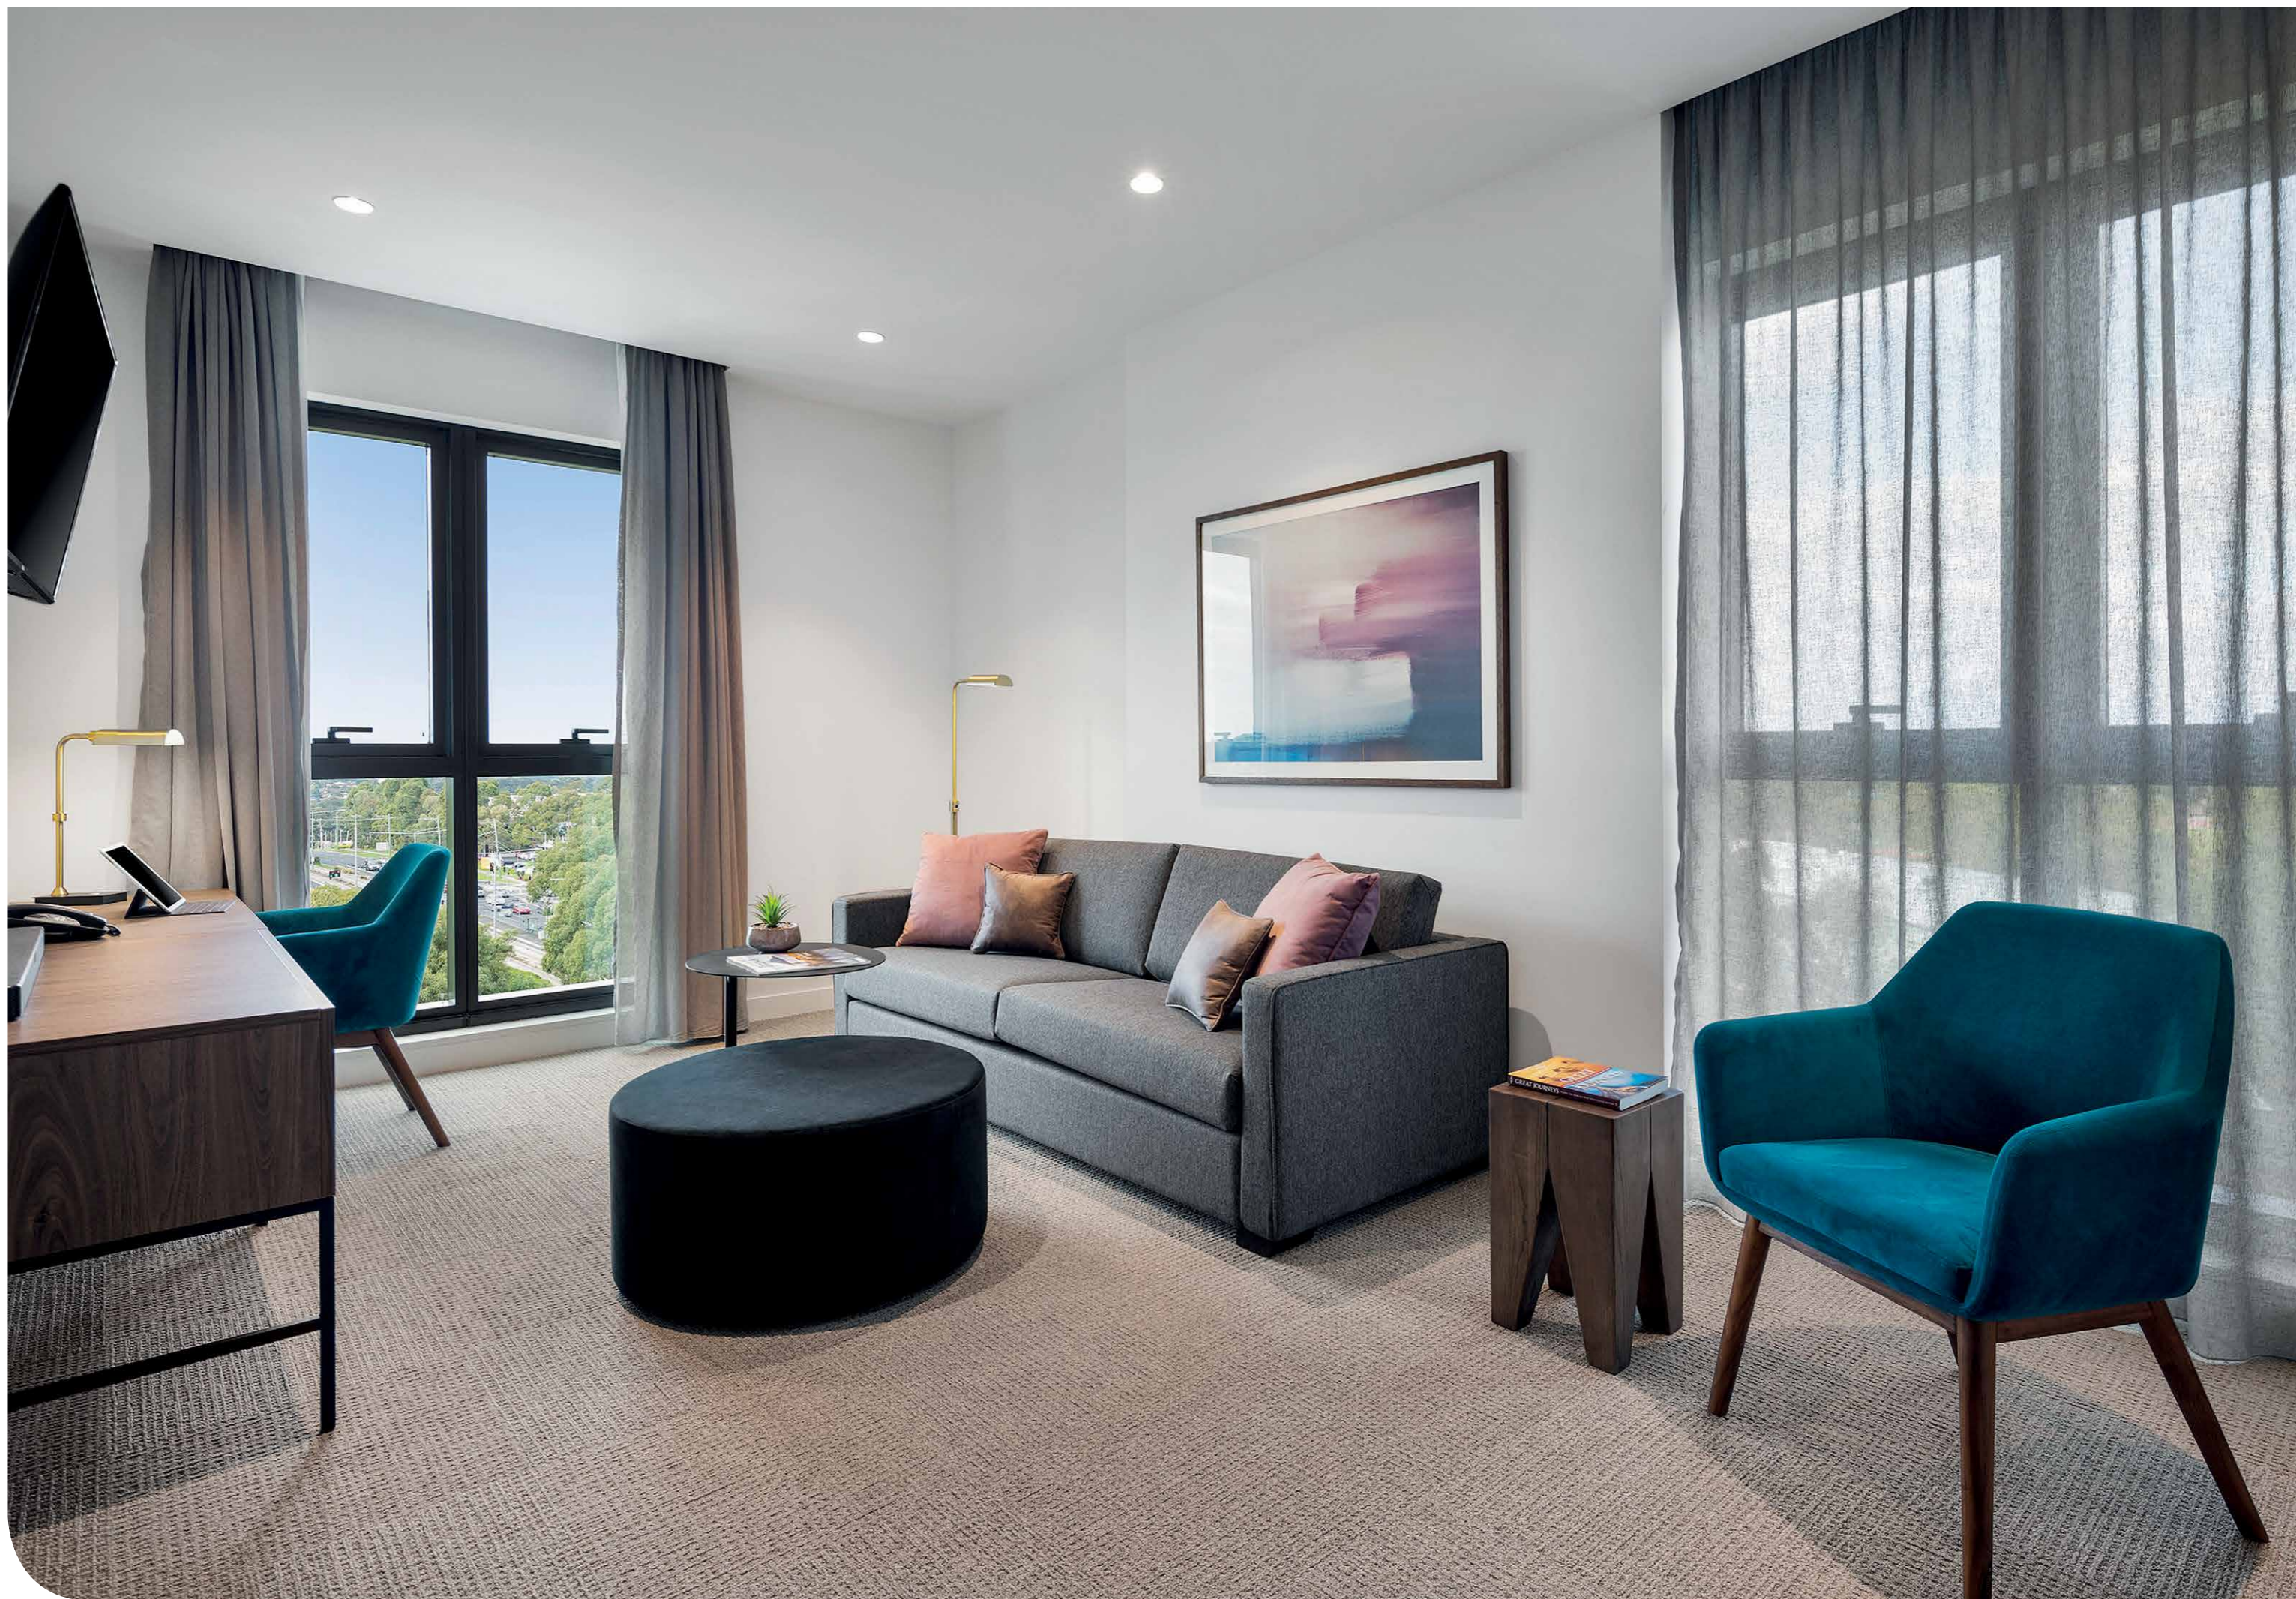

PROJECT MANAGEMENT FROM START TO FITOUT

At QFlow we appoint a dedicated experienced Project Manager to every project.

They work with you from start to finish, following a 7 step process:

1. Project Brief
2. Concept Design
3. Material Selection & Sampling
4. Manufacturing
5. Quality Inspection
6. Installation
7. Debrief & Completion

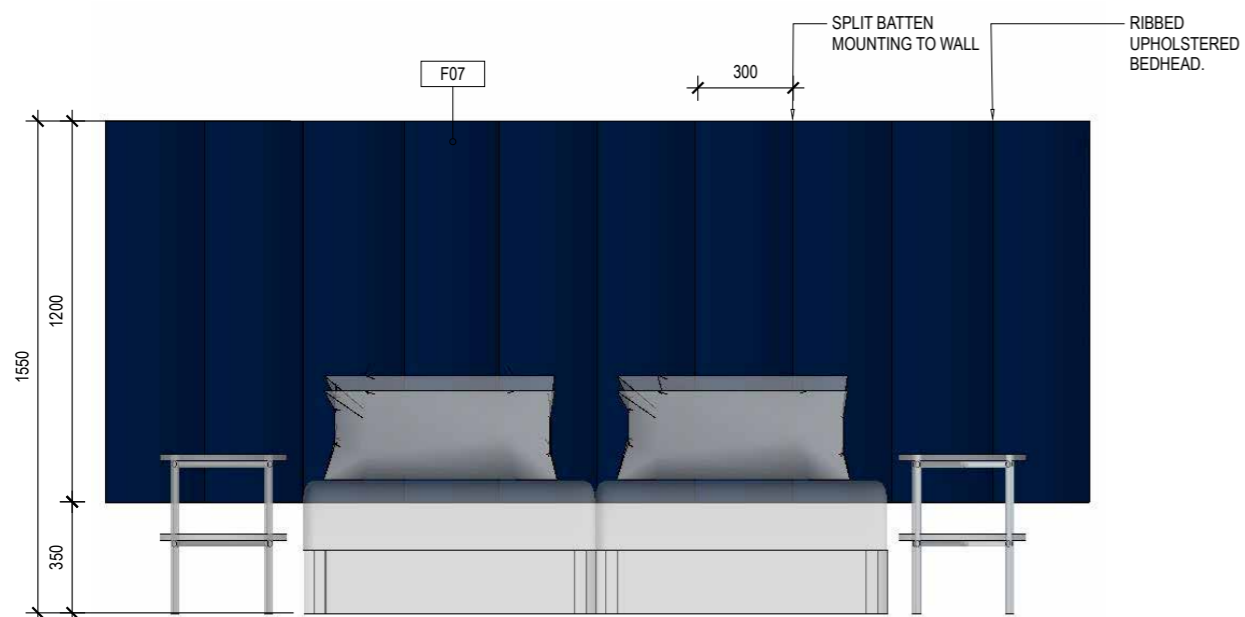

DESIGN FROM CONCEPT TO REALITY

Oflow works closely with our clients, taking design concepts into 3D visuals then sample pieces for approval before commencing production.

Our project team guides the client on the material selection to ensure the end result is commercially sound.

Your design takes shape, comes to life that is beautifully crafted and engineered to last.

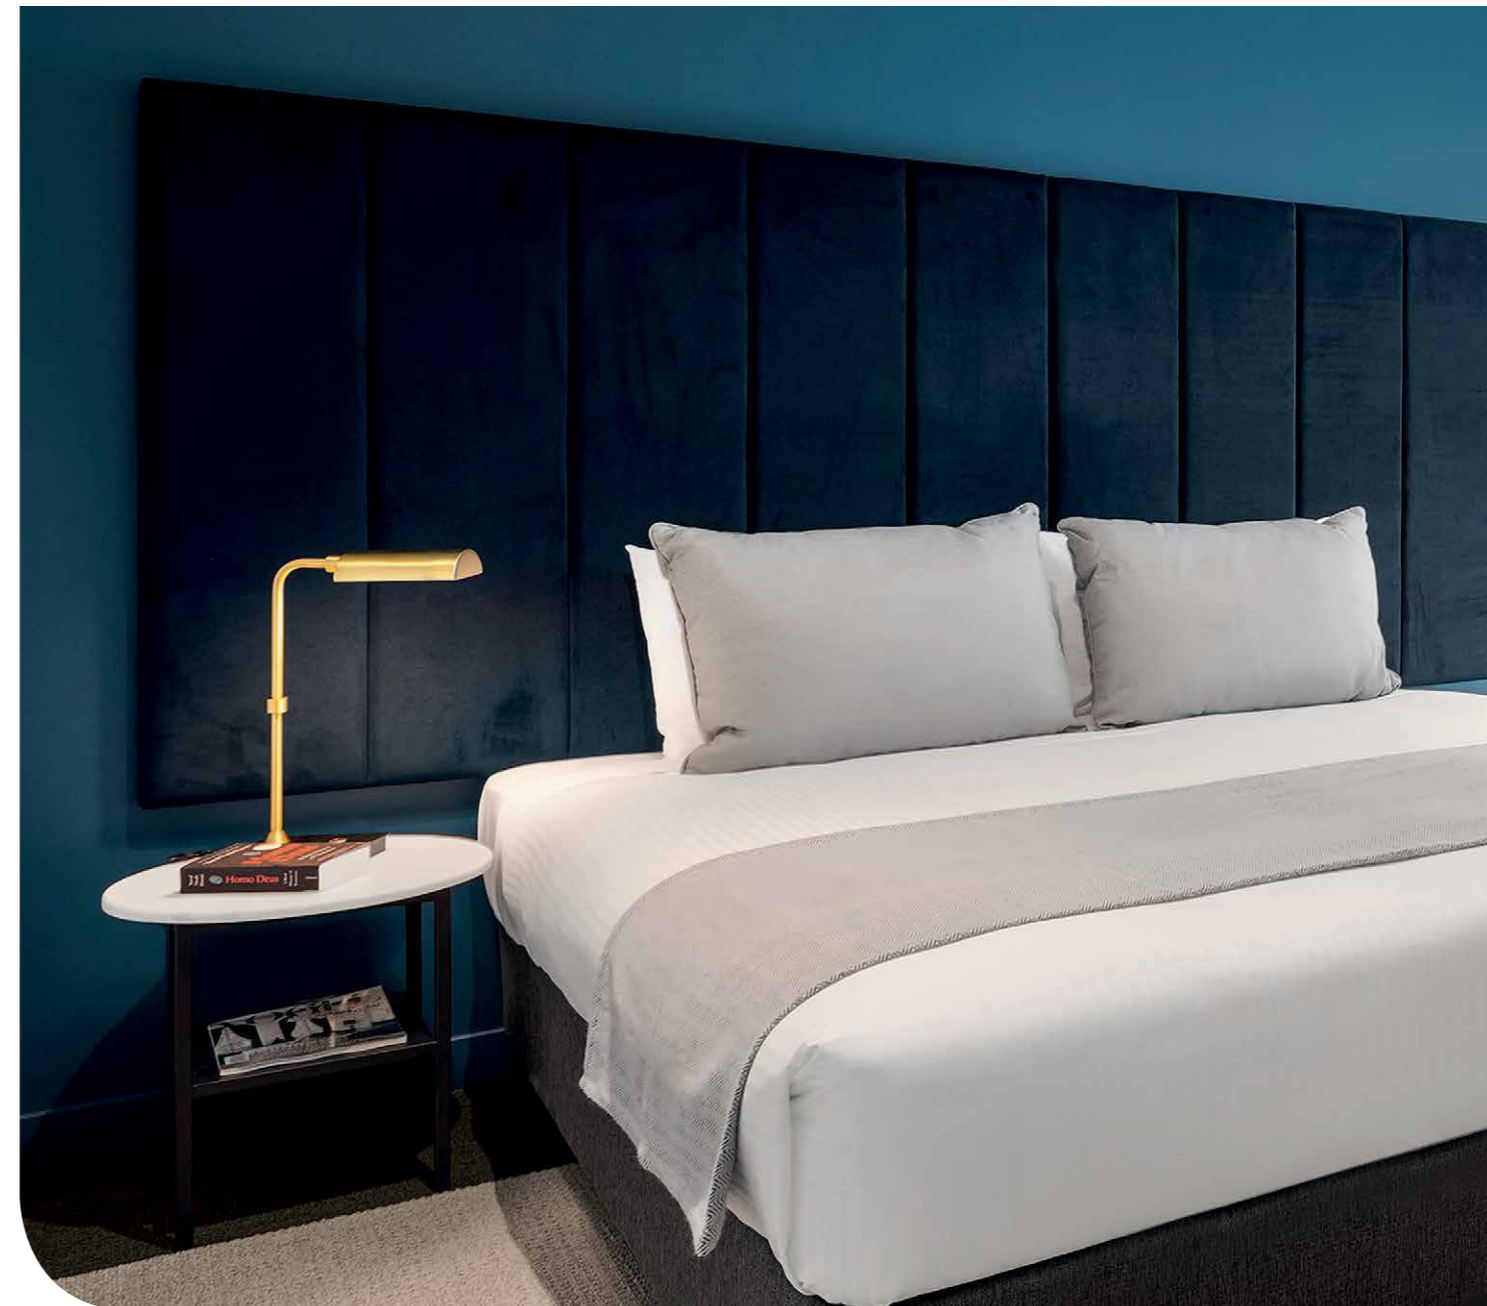

MATERIAL SELECTION & SAMPLING

Selecting suitable material is as vital as getting the design right. Our project managers work closely with you to create the balance between a beautifully crafted item and the commercial requirements of your furniture.

Oflow offer of choice of premium fabrics, timber veneer finishes available in range of natural tones and textures. High grade steel in various finishes from Brushed Stainless Steel, Nickel Black, Polished Gold and any powder coating colour that is needed to match your colourway.

Following the design and material selection, we produce samples of each piece of furniture and set up a sample room for your approval. This also allows you to touch and feel the piece of furniture before we commence the bulk manufacturing phase.

MANUFACTURING THE ART OF CRAFTSMANSHIP

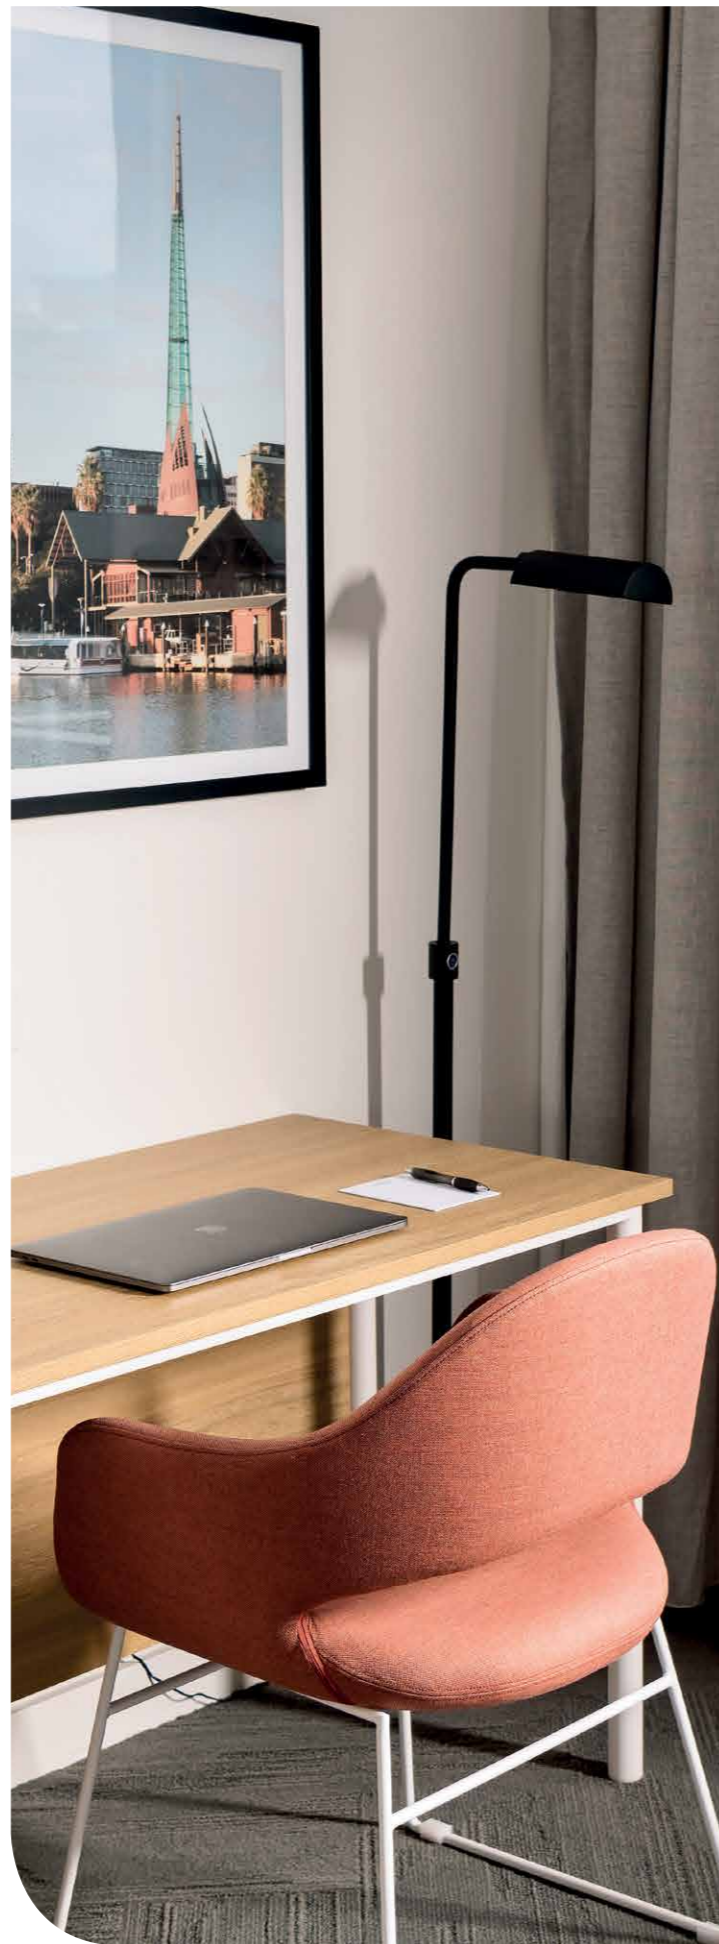

We use the state of the art manufacturing processes to build your furniture to the highest quality standard and to your exact specification.

As not all pieces of furniture are the same our manufacturing processes caters for all the material differences.

The QFlow Difference:

- Precision Cut High Grade Steel. Spot welds applied to key areas for additional strength
- Double stitch seams
- Tailored fabric covers from premium durable fabrics

The end result is a new piece of furniture with its own personality that takes center stage in any space where it is installed.

QUALITY INSPECTION PEACE OF MIND

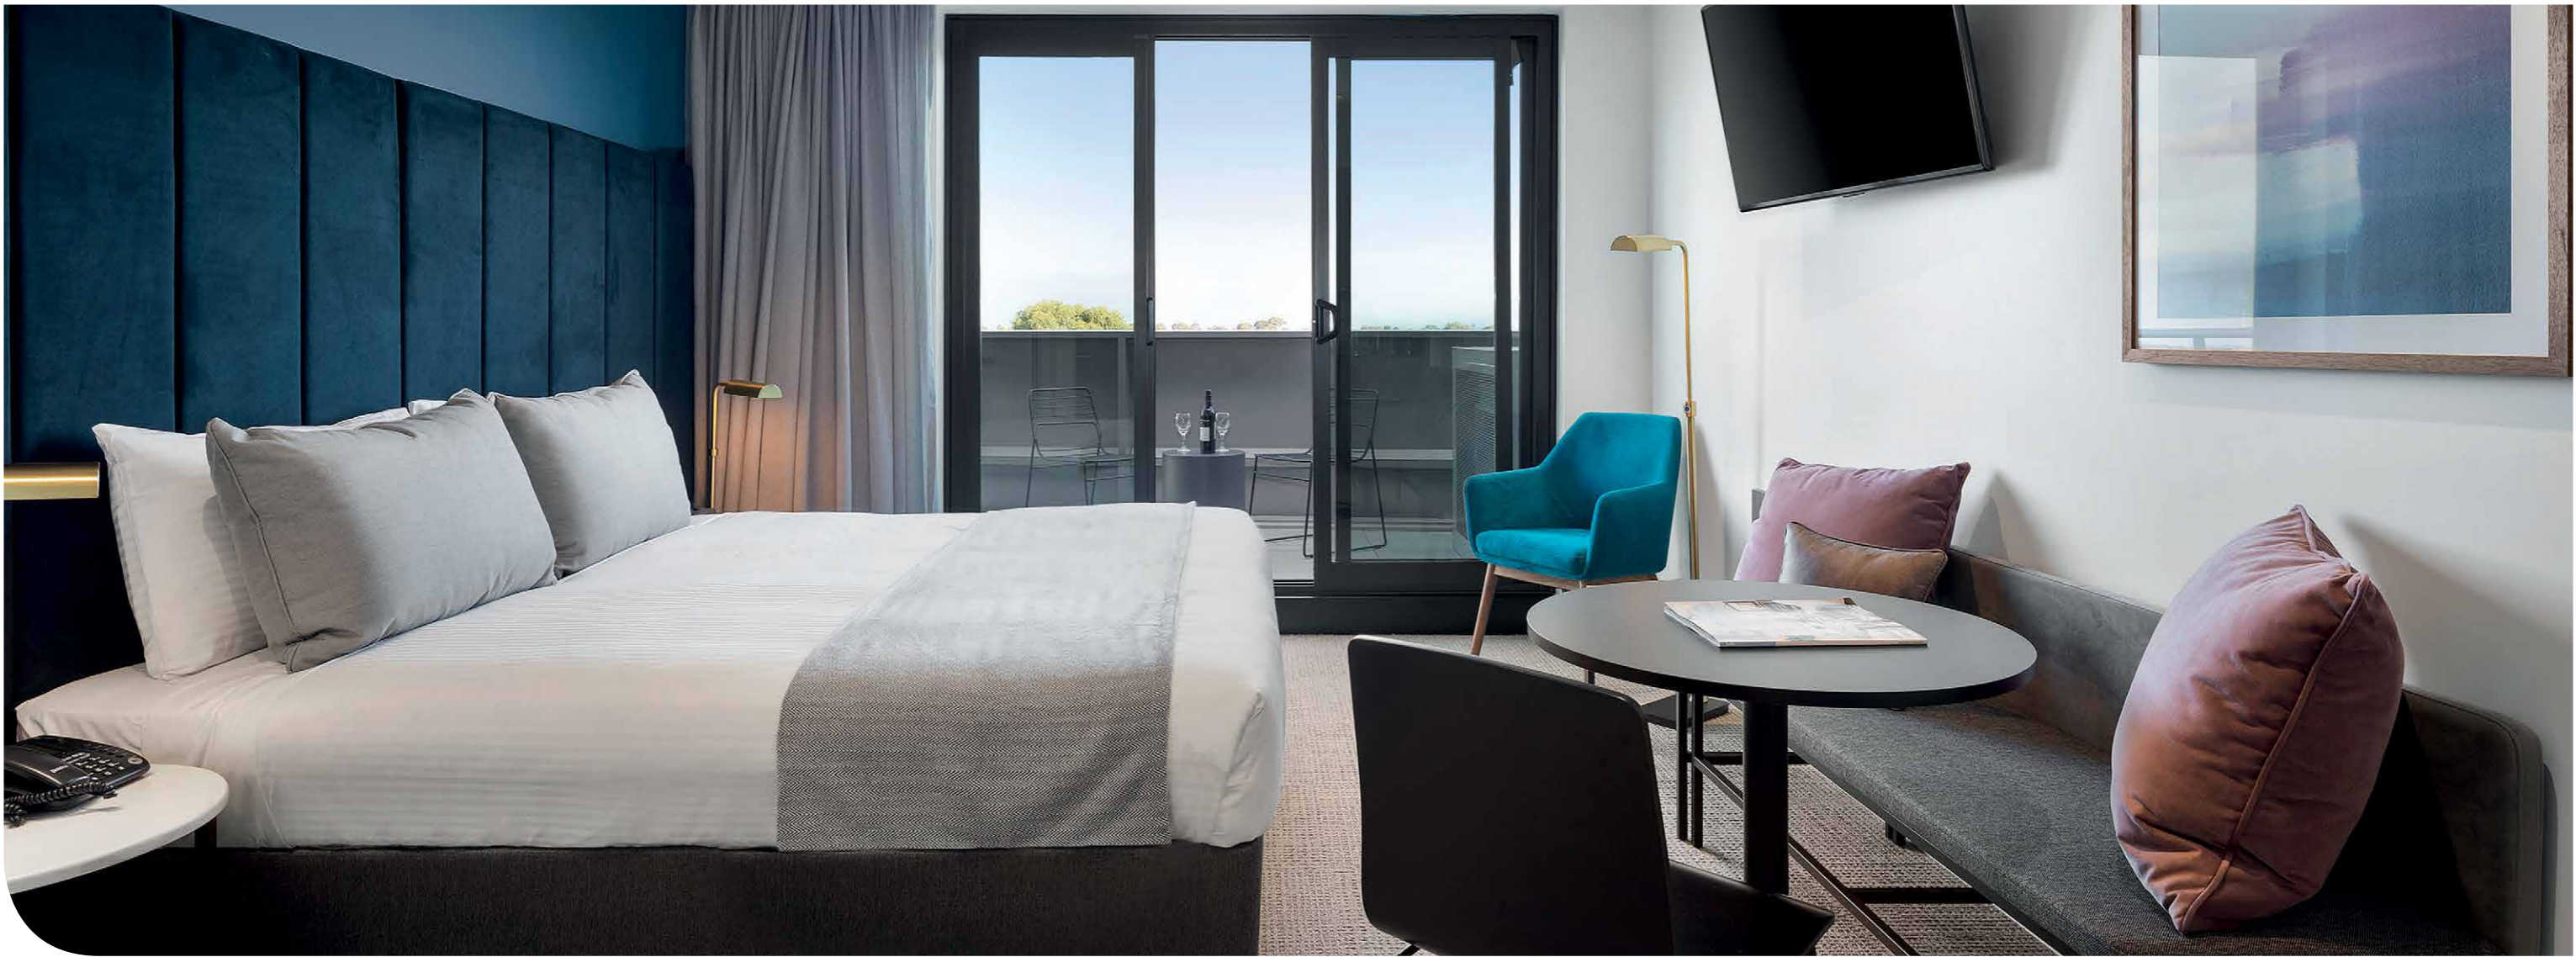

At Qflow our dedication to quality is beyond other manufacturers due to our commitment to customers matter most to our business.

Our quality process starts with our design engineers as they guide you on the best material selection and design. The manufacturing team adopts a rigorous and detailed approach to Quality Assurance to produce the products to the right standard and specified lead time.

Each piece of furniture is individually made to order using the best crafts that many manufacturers have replaced with mass production techniques.

Each piece of furniture on completion is then individually quality checked by our dedicated quality team. The end result is peace of mind as Qflow provides a 5 year warranty on all furniture frames.

INSTALLATION TAILORED FITOUTS

At QFlow we understand every project is unique. Our project managers work with you to ensure the delivery and installation phases are tailored to your individual needs & run smoothly from start to finish & on time.

Qflow has aligned itself with the best FF&E fit-out services in the market to ensure we have competitive pricing to meet your budget. We manage the service provider which covers a broad spectrum of activities:

- Delivery of the furniture from our manufacturing plant
- Local storage and distribution facilities on your behalf
- Develop a comprehensive project plan and schedule
- Manage onsite installation teams
- Staging and furniture assembly
- Ensure flexibility to adapt and respond to a constantly changing project plan
- Installation report per floor layout per furniture item

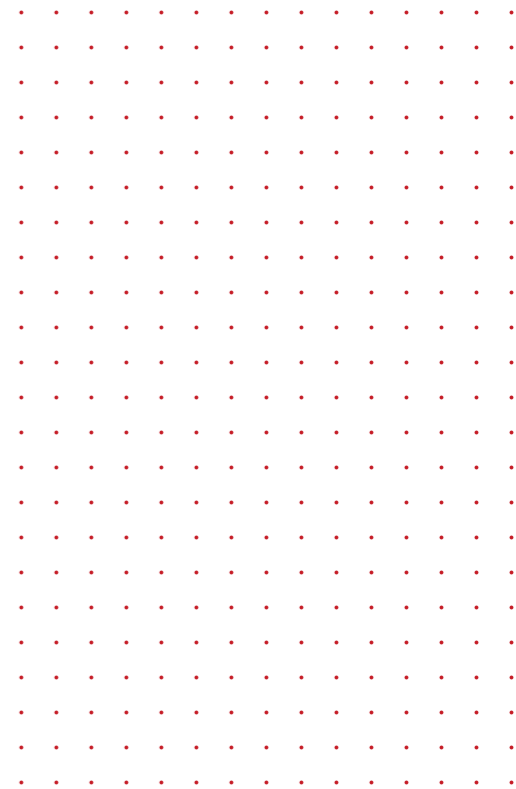

PROJECT DEBRIEF

As with all large fit out projects have their challenges, Qflow works with you to ensure all the gaps are filled to deliver a successful result for your refurbishment project.

At the debrief, Qflow works with you covering all the essential items from the installation:

- Additional items added to the scope
- Identify and resolve any final concerns

The end result is a successful project delivered to your exact specifications, peace of mind that you have completed a very impressive successful refurbishment with an experienced supplier that stands by its product.
